

5611 Pyxis Small T Courtesy Light

The Pyxis range of LED courtesy lights features a polymer LED light body which is then dressed with a number of different bezels.

In the case of the Pyxis Small T, the light body is combined with a slim round bezel. This product offers excellent and harmonious integration into interior or exterior designs.

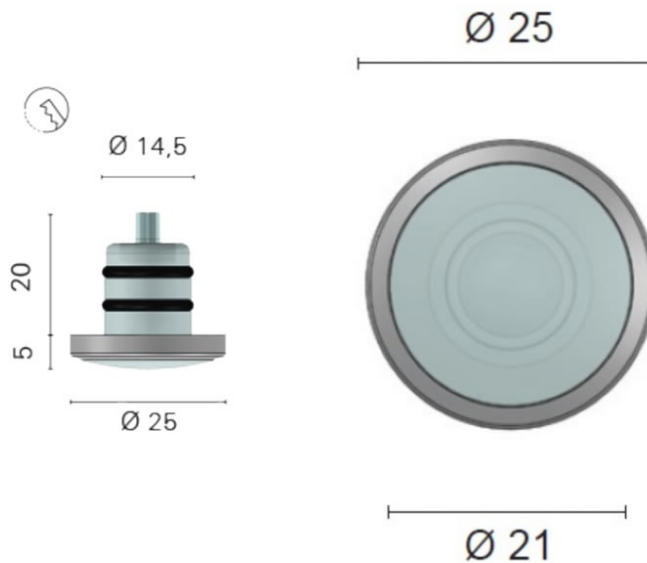

The Pyxis range of courtesy lights can be supplied with the optional installation cup. This cup can be bonded in place or set into GRP mouldings during the initial constructional phase. The light can then simply push into the cup when being installed. This system results in a highly servicable solution that can be easily upgraded or changed in future.
